## A STITCH IN TIME

In Stitches Customs and Interiors, an award-winning, full service, specialized customs shop, is now offering custom floor and trunk mats for your street rod. Family owned and operated, it's located in one of the world's powerboat capitals, Lake Havasu City, Arizona.

Manufactured exclusively from Corinthian Marine Aqualoc carpet, In Stitches mats can incorporate your car name, logo, or custom graphics. Easily patterned using a simple measuring system and household items, your distinct anti-slip backed mats will be hand cut for your ride and finished with a vinyl or fabric binding. The custom graphics are done with a true authentic carpet inlay and are not dyed, silk-screened, or embroidered, as is the case with inferior quality mats. In Stitches mats use of triple reinforced bonded marine carpeting ensures that they are ultra durable and easy to maintain. The mats are UV protected and the colors won't fade, and have a three-year limited warranty.

## FANCY WHEEL

Speedway Motors in Lincoln, Nebraska, offers metallflake steering wheels that will add sparkle and nostalgia to the cabin of any street rod. The classic three-spoke design features three stylish lightening holes in each spoke and brilliant chrome plating. The easy-grip vinyl rims are available in vibrant red, blue, green, and silver hues, each with sparkling metallflake molded into the durable grip material. Three sizes are available: 9-3/4-inch diameter with a 5-1/2-inch dish; 11-1/2-inch diameter with a 4-inch dish; and 13-inch diameter with a 3-1/2-inch dish. All styles have a common three-bolt mounting pattern that will fit directly on a Speedway Motors hot rod column, or most other columns using an adapter.

### EZ FIT

Flaming River Industries' EZ Fit steering shafts deliver precise steering control to all types of cars and light trucks using a two-joint steering system, with a user-friendly, no-cut installation.

The EZ Fit shafts install with simple hand tools, just attach one U-joint to the steering box or rack, compress the spring, attach the other U-joint to the steering column, and tighten the setscrews.

Using a precisely manufactured splined slip-shaft design with a unique spring tensioning system, the EZ Fit column provides shock absorption qualities and helps minimize vibration caused by bind between the chassis and frame. Each shaft features 3-inch telescoping travel. This design also offers collapsibility—a significant safety feature in an accident. The EZ Fit steering shafts are stainless steel construction for corrosion resistance and great appearance.

The EZ Fit steering shafts are offered in standard sizes for a number of Fords, Dodge truck, and Jeep applications. Custom lengths, factory built to the customer's specs are also available. The EZ Fit shaft also makes servicing headers a snap.

## MEASURE THIS

Summit Racing Equipment has taken some of the guesswork out of automotive plumbing projects with its new Summit Racing Equipment AN and NPT Auto Plumbing Gauge. Precision laser cut from 304 stainless steel, this handy tool can help determine exact sizes of male AN fittings sizes -4AN to -16AN; AN wrenches sizes -4AN to -16AN; NPT plug and fitting diameters 1/8 to 3/4 inch; outside diameter (O.D.) of stainless steel braided hose -4AN to -16AN; O.D. of steel brake, fuel, and transmission lines from 3/16- to 3/8-inch fractional sizes only.

The Summit Racing AN NPT Auto Plumbing Gauge is easy to use—simply match fittings, pipes, and hoses to the proper notch or hole in the gauge to quickly determine the correct size.

## LATEST IN COILOVERS

RideTech's engineering team started from the ground up with all new impact-forged aluminum shock body. This monotube gas pressure body design uses a 43 percent larger piston area versus traditional twin tubes for superior fluid management and outstanding ride quality. The 5/8-inch chromed shaft travels through a dual-seal rod guide for zero oil leakage and long-lasting performance. Available in fixed valving or rebound single adjustable in all popular lengths. Also features 1/2-inch bore Kevlar-lined spherical bearing mounts that eliminate shock noise and deflection normally found with rubber/poly bushing ends.
